

Information About Selenium

Selenium is a mineral that works as an antioxidant in the body. It can help to keep tissues healthy by preventing cell damage.

Selenium helps keep your immune system and thyroid working well.

Selenium may help protect against the development of some types of cancers and certain chronic diseases but this is still being studied.

How Much Selenium Should I Aim For?

<i>Age in years</i>	<i>Aim for an intake of micrograms (mcg)/day</i>	<i>Stay below* mcg/day</i>
Men and Women 19 and older	55	400
Pregnant Women 19 to 50	60	400
Breastfeeding Women 19 to 50	70	400

*This amount includes sources of selenium from food and supplements

Food Sources of Selenium

Selenium is easily absorbed from food. The best source of selenium is Brazil nuts. Selenium content of foods can vary considerably depending on the selenium content of the soil where the animal was raised or the plant was grown. The amounts listed below are therefore subject to variation. The following table will show you foods which are a source of selenium.
