

Information About Calcium

Calcium is a mineral that helps you build and maintain strong bones and teeth.

Good calcium intake throughout your life can help to prevent osteoporosis. When you have osteoporosis your bones are weak and thin from a loss of calcium. Weak bones can break more easily than strong bones.

Calcium is also used in other parts of your body. It helps your muscles work and your heartbeat.

How Much Calcium Should I Aim For?

Age in Years	Aim for an intake of milligrams (mg)/day	Stay below * mg/day
Men and Women 19-50	1000	2500
Women 51-70	1200	2000
